

MOBILE SOLUTIONS FOR MODERN HEALTH CARE

With telemedicine and home health care increasing in popularity, medical practitioners demand greater data connectivity and security from the IT solutions they use to care for patients. Engineered with the latest Wi-Fi technology, next-generation processors, enterprise-grade security, industry standardized software and housed inside an ultra-compact design, these premium laptops collect, process and transmit data securely with greater efficiency to help improve the quality of care. For more than three decades, Dynabook has pioneered the mobile computing sector to deliver the tools ideal for the medical professional.

KEY FEATURES

NEW AGE COMMUNICATION

Consult, diagnose and connect virtually with patients and peers via the Portégé X Series high definition web camera with noise-canceling, dual microphones for outstanding audio and visual quality. Some models also feature a world-facing camera when in Tablet mode.

LAYERS UPON LAYERS OF SECURITY

As a leading secured-core PC provider, Dynabook equips these Portégé laptops with a robust combination of next-level hardware, software and identity protection - including enterprise-grade encryption and authentication using biometrics - to enhance resistance to current and future cyber threats. Dynabook writes its own proprietary BIOS to provide a unique security foundation as an additional layer of protection against attacks.

HEAVY ON PERFORMANCE, LIGHT ON WEIGHT

Dynabook has perfected the ability to shrink, lighten and streamline its laptop designs without compromise. With select models starting at less than 1 kg, there is a good chance the Portégé is the lightest device in your bag.

MODERN BATTERY LIFE

Medical professionals need a reliable device to serve their patients with confidence. Using the latest battery technology and power management enhancements, these Portégé laptops extend beyond the work day on a single charge. If a second charge is needed, the battery can be replenished to up to 40-percent capacity in just 30 minutes via the quick charge feature.

BENEFITS OF WINDOWS

Equipped with Windows 10 Pro allows the Portégé laptops to easily integrate into any network environment and ensure compatibility with the latest electronic health records platforms.

CUTTING-EDGE PROCESSOR AND GRAPHICS PERFORMANCE

Featuring the new 11th Gen Intel® Core™ Processor and Intel® Iris® Xe graphics engine, Portégé laptops deliver unmatched speed and intelligence with a new level of graphics performance to review high-definition images and patient information.

A DISPLAY FOR EVERY ENVIRONMENT

These premium laptops offer a variety of screen options, including touch for patient charting, anti-glare for intense lighting environments, high brightness for outdoor use and privacy to protect confidential information.

DIGITAL PEN

Maintaining accurate notes and records is critical to successful patient care. The digital inking capabilities of the Portégé X30W are second to none and deliver a true pen-to-paper experience for note keeping.

IN-HOUSE ADVANTAGE

Dynabook is the only major PC vendor to employ an in-house approach for its laptops in design, engineering, manufacturing and testing to ensure each laptop delivers superior quality and reliability.
